DIRECT VENT FURNACE INSTALLATION IN MANUFACTURED HOMES

1) INSTALLATION IN MANUFACTURED HOMES

Williams Direct Vent Furnaces are allowed in manufactured homes when the following conditions are met:

- The manufactured home is permanently sited per local codes
- The manufactured home is manufactured after 6/15/1976 and is HUD approved with a red certification label (US Only)

Some models are allowed only in the USA and some are allowed both in the USA and Canada. This applies to aftermarket manufactured home installations where the home is sold, installed and permanently sited. Not for manufactured home manufacturing factory installation. These units may not be installed in trailers or recreational vehicles.
