

Monterey PLUS

Effective August 24, 2023, Williams will discontinue the manufacture of its Monterey Plus Top Vent Gas Wall Furnace. Part numbers include:

Model number		BTU/hr
Natural	Propane	Input
2509822	2509821	25,000
3509822	3509821	35,000
5009822	5009821	50,000

The Monterey Plus requires a 4" side clearance. The standard Monterey Top Vent Gravity Wall Furnace requires only a 1" side clearance on each side. That model is still available and is the replacement for the Monterey Plus series.

Replace with:

Model number		BTU/hr	AFUE	Thermal
Natural	Propane	Input		Efficiency
2509622A	2509621A	25,000	70%	72%
3509622A	3509621A	35,000	70%	72%
5009622A	5009621A	50,000	70%	74%

The changes made to improve the efficiencies of the Monterey include the pilot/generator assemblies, bracketing, internal baffling and orifice sizes. Physical dimensions/appearances remain the same.
